

***Alice is a graduate currently undertaking the Clinical Transition Program at Mater Private.***

**“** *As a Graduate nurse at Mater Private you gain a broad base of knowledge and, doing rotations you build up the amount of competencies associated with each area. One of the great things about the hospital is that it is a very warm and friendly environment to work in. You get to know staff from every area and everyone is approachable no matter what their position. The clinical educators are great, their support is fantastic and they are friendly and approachable. A real plus for me is the hospitals location, near the city, on the busway and straight off the freeway.*

**”**

**Exceptional People. Exceptional Care.**
