

***Bec Lewin is a
Registered Nurse at the
Mater Adult Hospital.***

“ *The Mater Graduate Nursing program was instrumental in supporting the transition from student to Registered Nurse. The program has provided me with invaluable opportunities to develop clinical and professional nursing skills, as well as a chance to experience different clinical areas. The graduate program’s clinical facilitators have also provided endless support in issues ranging from professional development and the facilitation of learning opportunities, to an open ear and a friendly smile at the end of a long day. The Mater graduate program has given me the solid foundations required to build a successful nursing career.* **”**

Exceptional People. Exceptional Care.
